SUMMARY

Systems Development Engineer with experience in integrating, designing, and developing production systems in C#, Python, SQL, and Node.js. The impacts of the systems include savings of over \$150,000 in hardware costs, a 50% reduction in required data entry, and centralized asset storage.

EDUCATION

AAS, Software Development

Spartanburg Community College
GPA: 4.0

December 2025
Spartanburg, SC

BS, Computer Science

Western Governors University

December 2026
Online

SKILLS

- **Languages:** C#, Python, SQL, Java, HTML, CSS, JavaScript, Node.js, TypeScript, C++, C, Kotlin
- **Frameworks and Technologies:** ASP.NET MVC, Razor Pages, WinForms, Entity Framework Core, xUnit, Junit, Spring
- **APIs and Data:** RESTful APIs, GraphQL, Pandas, ETL Pipelines, SQL Server, MySQL, Oracle APEX, NetSuite, Database Design
- **Tools and Platforms:** Git, GitHub, GitHub Actions, Docker, Azure, Visual Studio, VS Code, Android Studio, Eclipse

EXPERIENCE

Systems Development Engineer

Hamrick's

January 2026 – Present
Gaffney, SC

- Reduced product data entry by over 50% for over 650,000 products by architecting a production-scale product information data pipeline in Python and SQL, integrating modern and legacy ERP systems (99%+ reliability, multiple runs per hour)
- Collaborated with IT support to develop a suite of utilities in C# and Python for troubleshooting and fixing 180+ registers from the home office. Utilities include mass file distribution and one-click disaster recovery, saving 20-40 minutes per operation
- Eliminated scattered, inconsistent, duplicated asset storage across devices and network drives by engineering a custom digital asset manager for 25+ users across teams, providing searching and filtering, ERP integration, version control, and custom metadata fields
- Reduced hardware costs by 87% by developing an Android application to integrate with existing HTTP services, enabling a migration to lower-cost hardware

Software Development Teaching Assistant

Spartanburg Community College

January 2025 – December 2025
Spartanburg, SC

- Mentored students in programming and software development fundamentals using languages such as C#, Python, Java, Kotlin, and C++
- Provided instructor with support, including lecturing, grading, and updating course assignments
